CAMS Roundtable

- Status of IMDS/CAMS
- New CAMS Initiatives
- OS 2200 SB7 Release
- CryptoConnect
- DR Procedures

Status of IMDS/CAMS

- IMDS scheduled to begin QT&E II Apr 01 at Otis ANG
- If IMDS fails CAMS will be modernized
- CAMS GUI source selection in progress
  - Web Objects (high cost)
  - WebTS (free) Probable solution

New CAMS Initiatives

- Master Job Standards (MJST)
- F-22 IMIS Interface
- CV-22 TEM (26-27 Jun 00)
- New CULL reports on CAMS Homepage (http://lgm.ssg.gunter.af.mil/cams/subsystems/Database/DatabaseInfo.htm)

New CAMS Initiatives (cont)

- OS 2200 SB7
  - Load this week (12-16 Jun 00) on one machine for AIS testing
  - Load on other Gunter development machines 30 days later
  - Many new features make the Clearpath a super server instead of just a mainframe

OS 2200 SB7 Release

- Common Internet File System (CIFS)
  - provides a method to map the OS2200 file system to a Unix/NT style directory structure
  - allows PCs to mount OS2200 files through the “Windows Explorer | Tools | Map Network Drive” interface
- CpFTP: supports the standard FTP commands and interacts well with Unix and Windows systems
- InfoAccess
  - Provides a relational view of DMS 2200 databases
  - Provides Open Database Connectivity (ODBC) access to Data Management System (DMS 2200) databases

CryptoConnect

- Testing and turn-in scheduled for 12 Jun 00
- OT&E at Randolph late Jul 00
- Live release Aug 00
- Provides encryption between PC and NT Gateway
- NT Gateways at each DMC
  - Six at OK City
  - Five at Ogden
  - Three or four at Ramstein about early 2001

DR Procedures

- Incident entered into Remedy by User, FAB, or Func
- FAB or Func places incident into DR status
- “AIS Evaluation” = DR status
- “AIS Validation” = Scheduled for release
